

DIABETES IN PREGNANCY

NT Clinical Register Information for Women

WHAT IS THE CLINICAL REGISTER?

The Clinical Register contains information about women with diabetes in pregnancy in Northern Territory.

All women who have diabetes in pregnancy can be included on the Clinical Register. This includes type 1, type 2 and gestational diabetes.

The Clinical Register assists health professionals involved in the management of your diabetes care during pregnancy, including follow up for diabetes screening after pregnancy. Summary information also helps health services improve care for women with diabetes in pregnancy. Your information will be collected for the Clinical Register unless you advise otherwise (opt out).

INFORMATION COLLECTED FOR THE REGISTER

The Clinical Register contains information about your diabetes, pregnancy and baby's birth.

Information that is collected includes individual details, pregnancy health information, diabetes test results (before, during and after pregnancy), diabetes medications, delivery information, your baby's health at birth, and breastfeeding.

REMOVING YOUR NAME FROM THE CLINICAL REGISTER

Your information will be collected for the Clinical Register unless you advise otherwise (opt out).

If you do not want your name to be included on the Clinical Register please let a health professional looking after you know, who will request your information to be removed on your behalf. You can ask for your name and information to be removed from the Clinical Register at any time with no consequences to your health care.

You can also remove yourself from the Clinical Register at any time by completing the opt-out form available at <https://diabeteslifecourse.org.au/diabetes-in-pregnancy-partnership/>
